Vehicle Loader Conveyor

Transportecnic

Mobile powered loaders are designed specifically for use in premises without a raised loading dock, which makes it ideal for loading vans and other smaller vehicles. Using this unit makes your vehicle loading/unloading operation faster, safer and more efficient, and helps you comply with manual handling regulations. Please phone our sales office with your requirements on **01482 833557**.

Specifications

- 50 kg capacity per linear metre
- 600mm belt widths as standard.
- 20m/min belt speed. Variable speed drives are available on request.
- Variable height at low level for manual handling or joining to an other conveyor.
- Variable tongue height for use in any vehicle type.

Features

Construction – Heavy duty construction and supporting frame work make Best Mobile Loaders one of the most robust units of its type on the market.

Shrouded Buttons – To limit the damage to emergency stops.

Fully Guarded – All moving or rotating parts are fully guarded to prevent entrapment and injury.

Mobile – units are fully mobile utilising $\varnothing 200$ mm heavy duty castors.

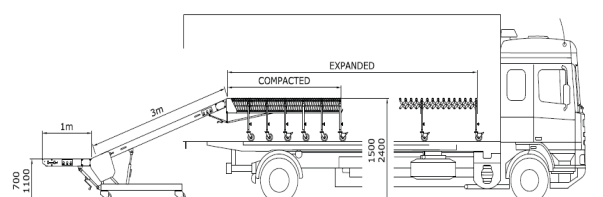

Power – are normally powered via a simple 240Vac plug connection. 110Vac and 415Vac versions are available. Each unit comes with ancillary sockets to power adjoining flexible conveyors.
